## Bio Summary:

History - Mr. Bowie is powered by passion and 29+ years of boots on the ground experience within various industries including start ups, merchant markets, enterprise businesses and beyond...

Bowie has passion in creating innovative ways of generating out of the box concepts for his clients and his companies with laser focused strategy, while keeping up with current trends and establishing lucrative pathways. Even with successes naturally brings losses, though success is not always 100%, his effort and energy is always 100% given on all his endeavors win or lose.

Defined as a conceptual thinker, visionary, Bowie is skillful in high impact business strategy, business development, presenting solutions, customer relations expert, program and project management, problem solving, developing, managing and maintaining sustainable connections and relationships, while nurturing his love to help others grow.

The important morals of Bowie breathes philanthropy, loyal family man and also first on the scene for friends in need. He loves being side by side with his community of philanthropists offering support and giving back. Bowie is energized by new challenges, building business, being trend eccentric and innovating is a real passion. Talented negotiator with keen abilities in planning, goal setting, strategy implementation and follow up with a customer first attitude while holding his partners, teamsters and shareholders in the same respect.

In 1995 Bowie kicked off his business ventures at a young age and started in the restaurant industry developing restaurant concepts and what would become the largest restaurant and hotel food delivery network starting in San Diego, CA.

From there in 2004, Bowie set focus on the financial industry and shortly became partner of a financial brokerage firm in Minneapolis, MN. Since the his relationships grew strong, built investment opportunities bridging the gap between private buyers & sellers in Real Estate. In 2009, Jai began a new chapter in "fatherhood". This shifted his whole retrospective mission to "Grow" and would push him even harder "To Life" as a father, human, son, brother, friend, business partner and business man.

In early June 2011, shifted focus to the ATM industry. Bowie's vision aimed to fill the void above ATM machines with digital advertising programs and local community retail business consulting. Over the years, he became an expert in merchant retail business services and developed successful community driven programs and new revenue channels for local retailers.

Since then, Bowie's long lived passion for natural health and wellness living set him on a mission to develop hemp based wellness initiatives that could literally help change the very world we live in today.

Over the past five years, Bowie has been working directly with farmers and growing communities in the US and North/South America, with connections in agriculture globally. Currently developing initiatives for sustainable organic agricultural resources that will help support powerful reforestation and global restoration initiatives. Mission forward to create fun thrilling impactful engaging experiences, and sustainable communities from micro to macro and back! Always thinking forward with our future generation in mind!
